Summary

Senior Software Engineer with 10 years building products people actually want to use. From call center software that cut handle times by 40%, to AI agents fielding hundreds of daily customer calls - I care most when the end user feels it. Passionate about the web platform, agents, AI pipelines and HTML5 games.

Experience

Signals Not Noise (Software Consulting) Ballito
Company Owner & Principal Engineer March 2023 - Present

- Architected call center solution handling **2K+ daily leads** (NestJS, TypeScript, MSSQL, SPA with native web client), **increasing agent performance 30%**, decreasing infrastructure costs
- Built AI-powered BI platform connecting database with LLM via Agent Framework, **reduced reporting time 90%**
- Built customer support voice agent (Eleven Labs, MCP server, React Native) querying + reducing Enterprise API data
- Designed high-throughput WhatsApp event queue (BullMQ/Redis) **processing 1K+ messages daily** with exponential retry and analytics
- Implemented computer vision pipeline for automated document processing, **reducing manual data entry 80%**

Zoover (Travel eCommerce Platform) Rotterdam, NL
Senior Software Engineer Aug 2022 - Mar 2023

- Developed Next.js travel booking web app serving **800,000 monthly active users**
- Drove web app state management refactor, contributed to Python backend services

<https://www.zoover.nl>

Mendix (Low-Code Platform) Rotterdam, NL
Software Engineer Nov 2019 - Oct 2021

- Developed widget framework (Node.js, TypeScript) used by **10,000+ developers**, improving productivity through enhanced APIs and documentation
- Contributed to C# + Scala codebases for enterprise applications, expanding technical expertise across paradigms

Team Lead Oct 2021 - Aug 2022
Led React Native content team of 5 while maintaining developer responsibilities, **delivering widgets and platform features** that increased adoption

Responsive Digital (Digital Agency) Cape Town, SA
Contractor, Software Engineer Sep 2018 - Oct 2019

Built content management platform for Flamelink: integrated web app, Node API and JavaScript SDK leveraging Firebase for streamlined content creation

Experience

Kurtosys Systems (FinTech SaaS)

Cape Town, SA

Aug 2017 - Aug 2018, Jan 2026 - Current

Senior Software Engineer

Jan 2026 - current

- Refactored user-impersonation into a faceted search in web app, improving UX
- Identified and reported critical system vulnerability
- Contributed to document authoring & generation workflow system

Software Engineer

Aug 2017 - Aug 2018

- Built custom financial reporting solutions for enterprise clients using React & Redux and Node ETL pipelines
- Automated data workflows for Triodos Bank, **reducing processing time**
- Led JavaScript training program for junior developers: ES6 classes, higher-order functions, memoization techniques

<https://www.kurtosys.com>

Global Logistics Internet SA (Betting Technology)

Cape Town, SA

Software Engineer

May 2016 - July 2017

- Maintained Python & Django lottery platform
- Built real-time lottery web application using Angular and WebSockets
- Transitioned legacy jQuery systems to modern frameworks
- Built back-office SPA using Angular, Express & Postgres
